Transactions

Problem Statement & Vision

Business Challenge

Retailers face complex multi-brand inventories and shifting payment preferences. This analysis bridges the gap between raw transactional data and strategic decision-making.

- Optimize inventory velocity for top models.
- Analyze payment gateway efficiencies.
- Identify brand-wise revenue clusters.

Technical Methodology

Data Modeling

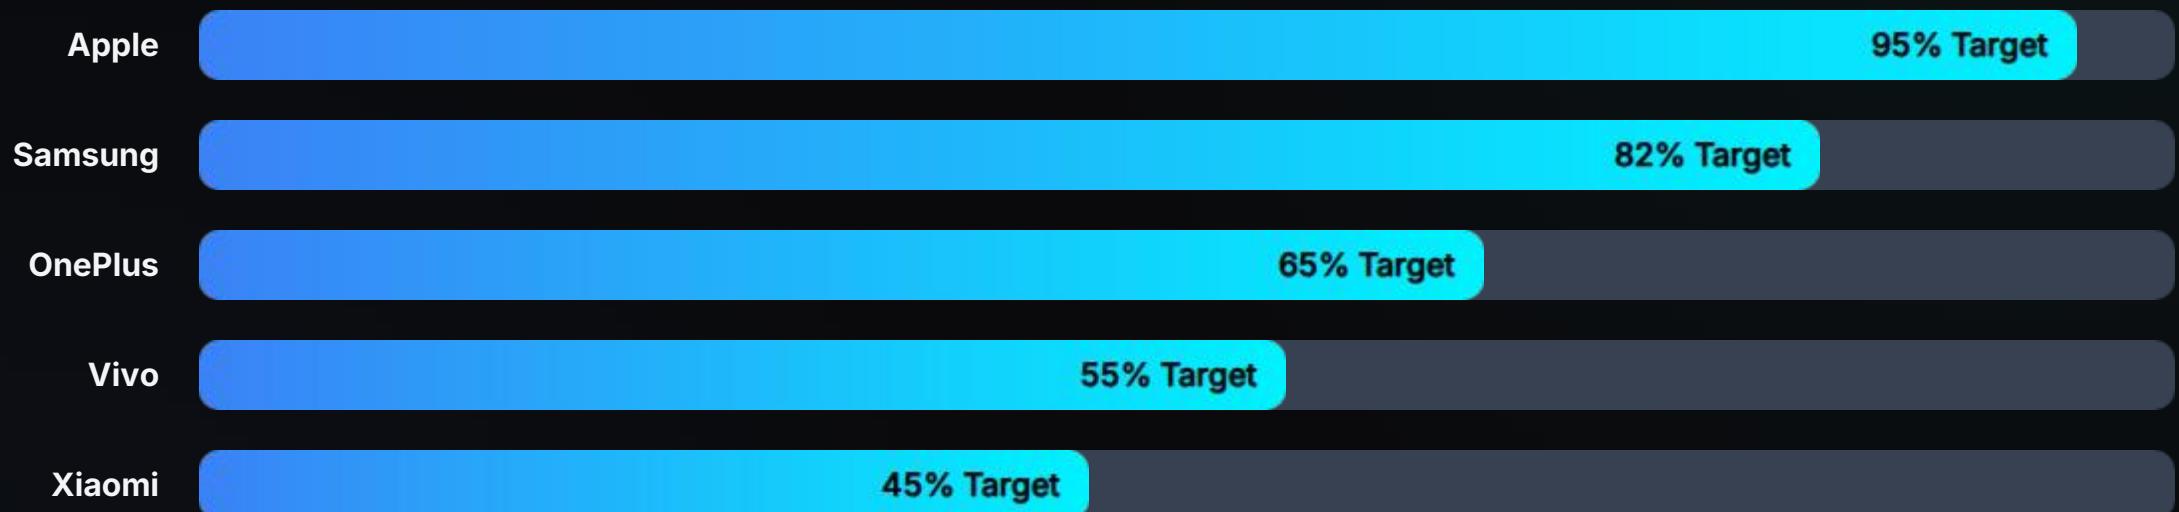

Cleaned and transformed 40K sales rows.
Implemented a robust data model with normalized relationships to ensure report scalability and high performance.

DAX Analytics

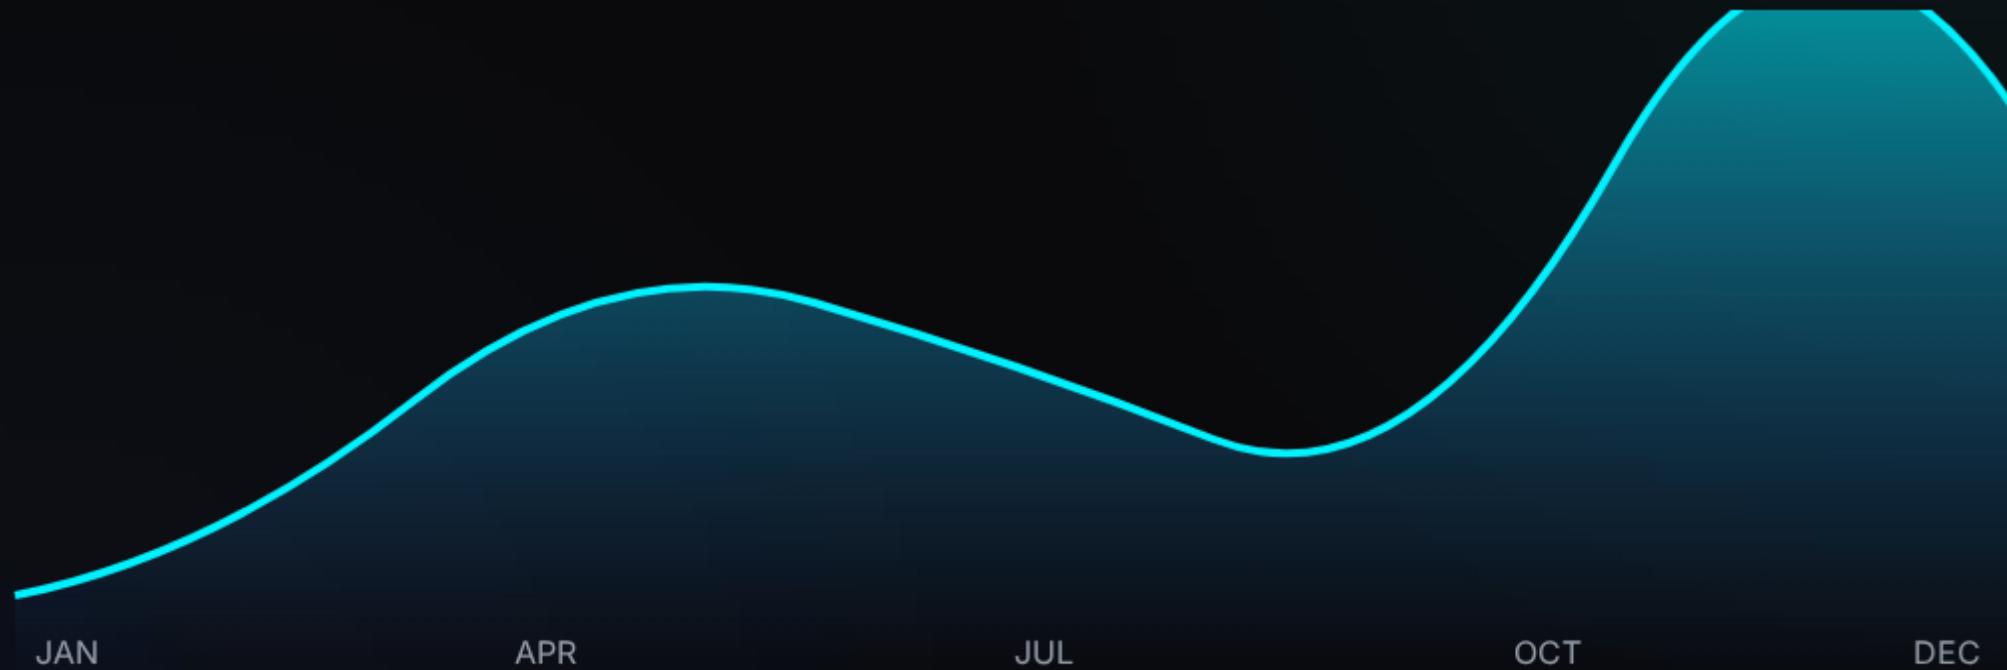

Authored advanced DAX measures for real-time KPI tracking. Developed time-intelligence functions for Year-over-Year and Month-over-Month trend comparisons.

Brand Performance Analysis

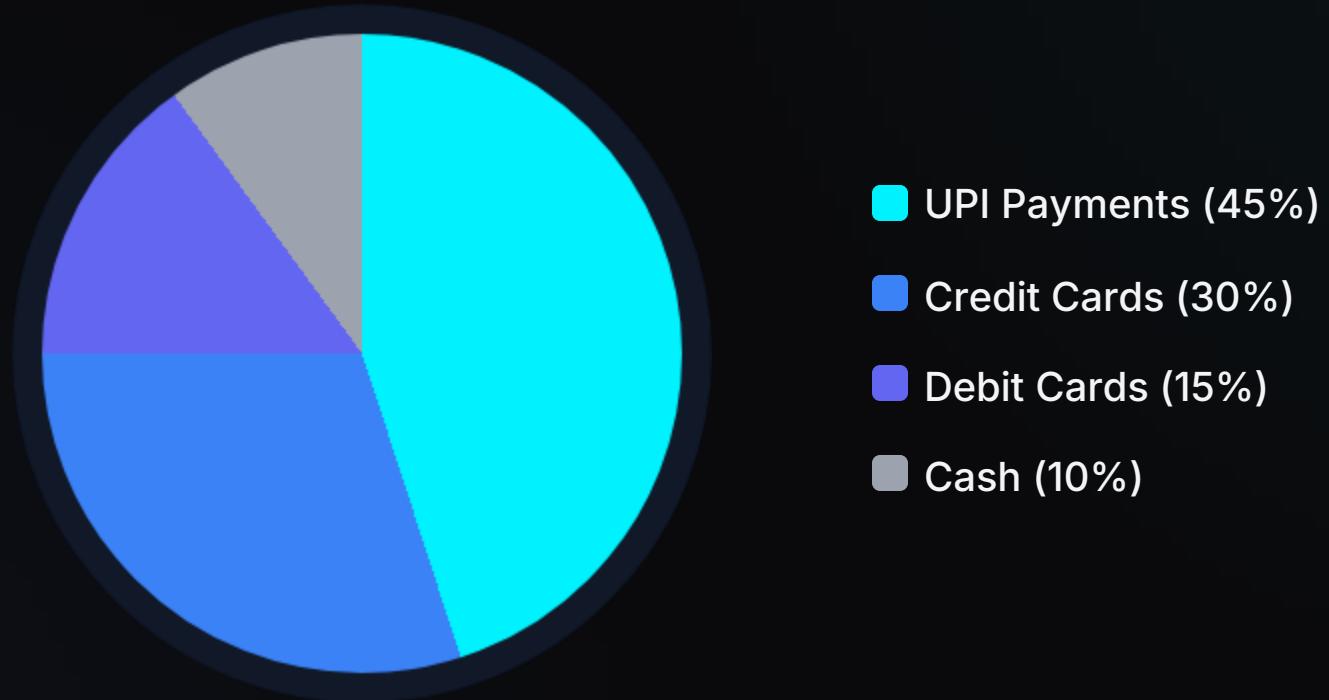

Apple and Samsung emerge as the dominant revenue anchors, driving 60%+ of total sales value.

Monthly Revenue Trends

Significant sales peaks identified during festive cycles and year-end inventory clearances.

Payment Method Contribution

Strategic Insights

Weekend Peak

Volume analysis proves that weekends outperform weekdays by 25%, driven by consumer leisure shopping patterns.

Digital Dominance

Digital-first payment methods (UPI & Card) account for 90% of total transactions, reflecting modern consumer behavior.

Premium Shift

High sales concentration in Apple and Samsung suggests a maturing market leaning towards premium tier mobile devices.

Model-Wise Sales Comparison

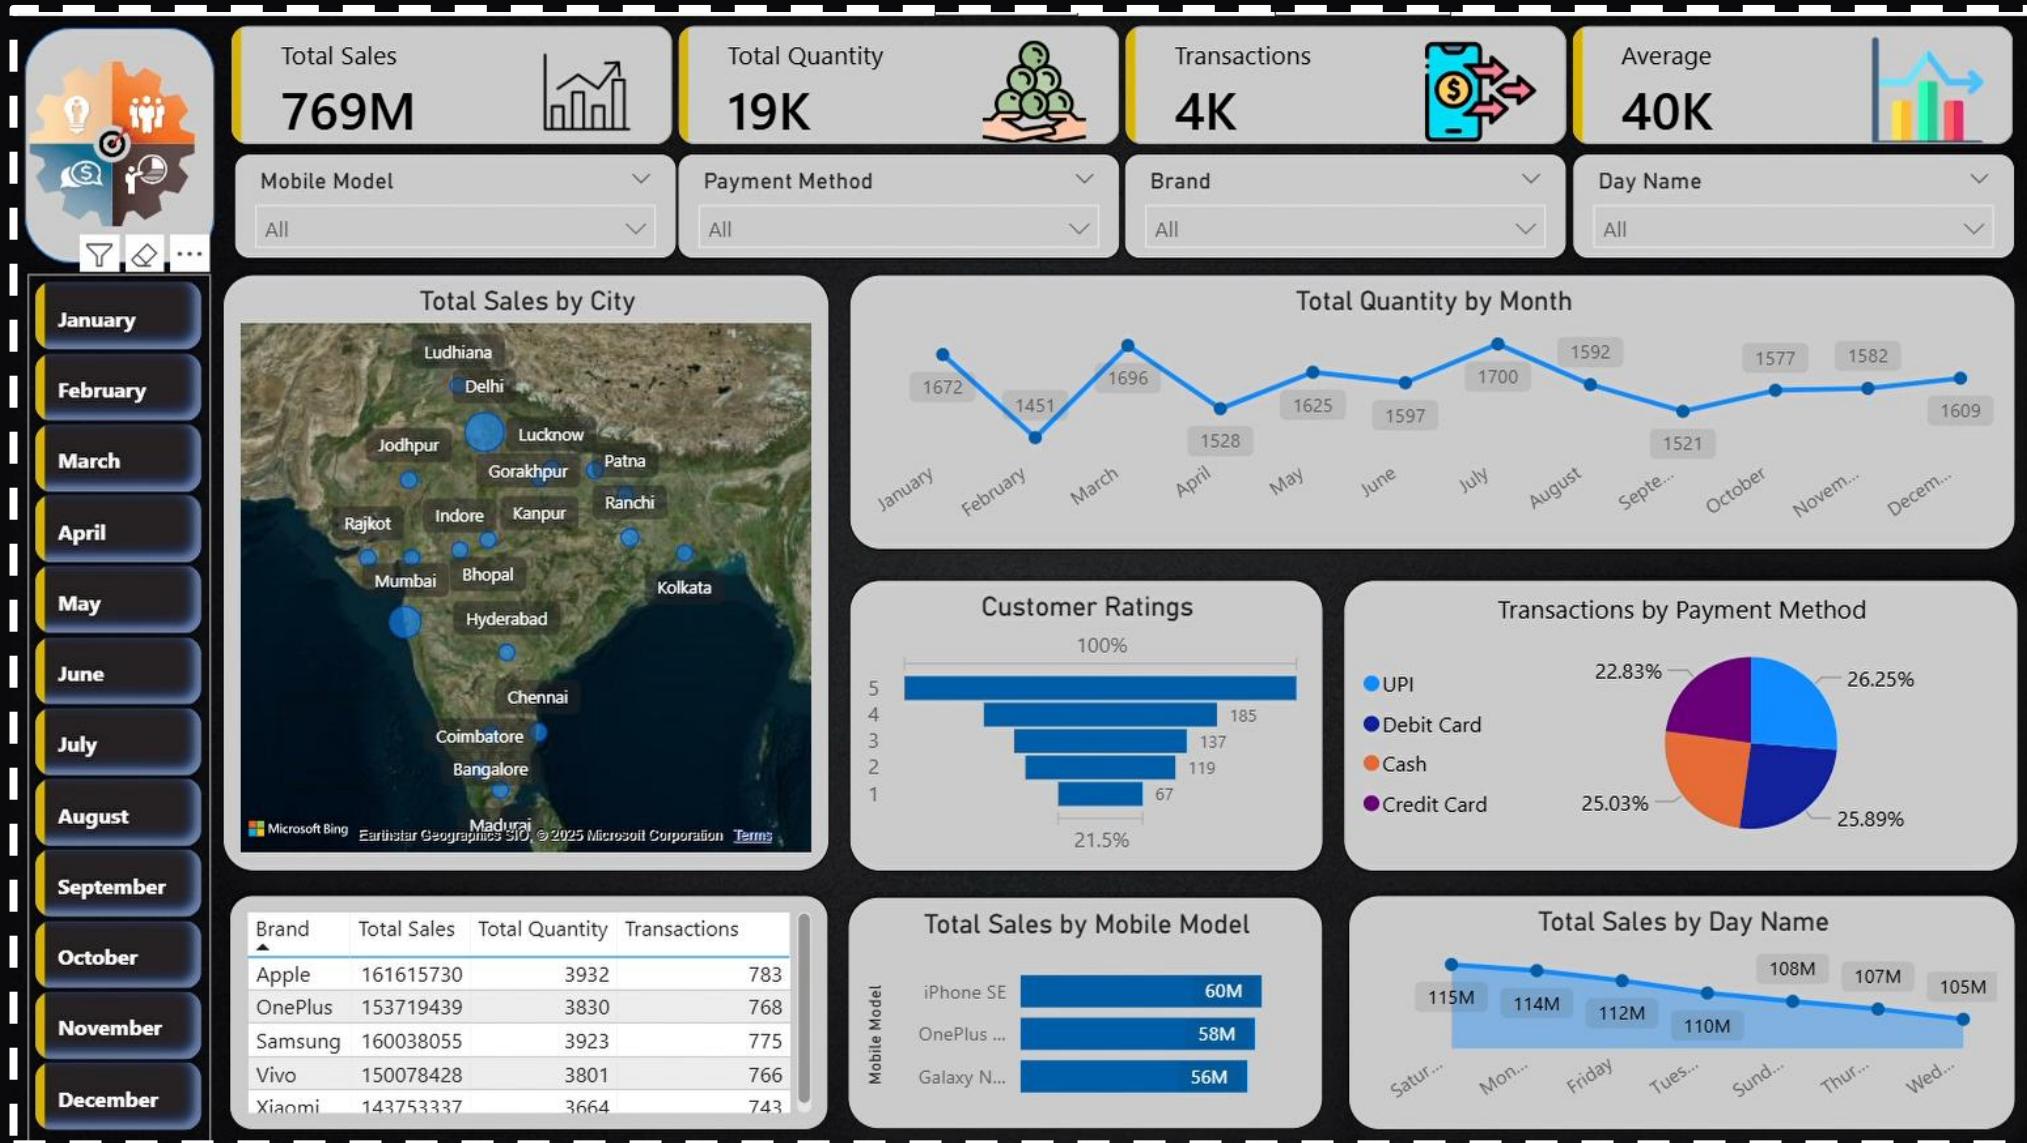

| Mobile Model | Brand | Qty Sold | Avg Rating | Revenue Cont. |
|------------------|---------|----------|------------|---------------|
| iPhone 15 Pro | Apple | 4.2K | 4.8 | 22% |
| Galaxy S24 Ultra | Samsung | 3.8K | 4.7 | 18% |
| OnePlus 12 | OnePlus | 2.9K | 4.5 | 12% |
| Redmi Note 13 | Xiaomi | 3.1K | 4.2 | 8% |

Recommendations

Strategic Roadmap

- 1. Optimize Inventory:** Increase stock levels for flagship models during weekends to capture maximum demand.
- 2. Payment Efficiency:** Focus on UPI-specific promotions to further reduce transaction friction.
- 3. Marketing Alignment:** Direct premium marketing efforts towards the identified 4K+ high-frequency customers.

Final Dashboard in Power BI

Thank You
